

Honeybee header tech tips

1. Remove canvasses, check roller bearings and decks at the end of the season.
2. Change hydraulic oil filter once per year.
3. Check knife and guards every day.
4. Check canvas tracking before season of use.
5. Check reel support hardware annually.
6. Check knife head for play or misalignment.
7. Check for proper flotation.
8. Keep checking the pressure guage, an increase could indicate a drive problem such as bad roller bearings.
9. Make sure auger finger timing bolts are tight!
